

TANISH MANOJ JANGALE

Junior Software Engineer | Cybersecurity Analyst | IT & Software

+91 93264 82653 | tanishjangale05@gmail.com | linkedin.com/in/tanish-jangale-7025a329 | Mumbai, Maharashtra

PROFESSIONAL SUMMARY

BCA graduate from Amity University Maharashtra (CGPA 8.24/10, completed 2026) with professional startup experience at XQORA Technologies executing technology-oriented business communication, digital initiatives, and client requirement analysis. Combines a solid technical foundation across Python, Java, SQL, React.js, Node.js, Flask, and REST APIs with hands-on development of full-stack software and threat analysis platforms. Demonstrates cross-functional problem-solving, structured execution, and rigorous understanding of cybersecurity, networking, and IT environments.

TECHNICAL SKILLS

Programming: Python, Java, SQL, JavaScript, HTML5, CSS3

Web & Backend: React.js, Node.js, Flask, Next.js, Tailwind CSS, Vite, REST APIs

Databases: MySQL, MongoDB, XAMPP, phpMyAdmin

Cybersecurity: Threat Analysis, Networking, Linux, Kali Linux, Identity & Access Management (IAM), Threat Modelling, Cybersecurity Fundamentals

Tools & Environments: Git, GitHub, Docker, VS Code, Android Studio, Eclipse

Analytics: Power BI, Tableau, Excel, Data Visualization

Core Concepts: Object-Oriented Programming (OOP), DBMS, Authentication, Role-Based Access Control (RBAC), Debugging, Testing

PROFESSIONAL EXPERIENCE

XQORA TECHNOLOGIES

July 2026 – Present

DME | Technology Startup | Mumbai, Maharashtra

- Drive technology-focused marketing and digital initiatives to support the market promotion of software and IT services across multi-channel campaigns.
- Lead technology-oriented business communication and digital execution, translating complex software capabilities into structured marketing and social media content.
- Coordinate directly with internal cross-functional teams to align project objectives, evaluate business requirements, and streamline digital campaign operations.
- Manage end-to-end recruitment and hiring campaigns for technical and business roles within an agile, fast-paced startup environment.
- Engage in client and business communication to capture technology-related initiatives, ensuring seamless operational alignment and prompt issue resolution.

KEY PROJECTS

ThreatScope — Cybersecurity Intelligence Platform

Independent Project

Technologies: React.js, Flask, Python, JWT, REST API, SMTP

- Architected a full-stack cybersecurity threat intelligence platform featuring secure JWT authentication and granular role-based access control (RBAC).
- Engineered a multi-format file ingestion engine supporting TXT and PDF documents for threat identification, classification, and risk assessment scoring.
- Designed and integrated an administrative dashboard providing downloadable PDF threat reports and system overview metrics.

College Connect — Intra-College Marketplace

Full-Stack Application

Technologies: React.js, Node.js, MongoDB, Socket.io, Cloudinary, Nodemailer, REST API, MVC

- Built a full-stack student-to-student marketplace enforcing college-email domain validation and secure Nodemailer OTP verification.
- Implemented real-time bidirectional messaging with Socket.io featuring live chat feeds and real-time typing indicators.
- Integrated Cloudinary cloud storage APIs for multi-image product listings alongside indexed full-text search across MongoDB collections.
- Structured the backend using Model-View-Controller (MVC) design patterns and secured administrative moderation tools with student/admin access controls.

Leafly — Premium Tea E-Commerce Platform

Client Project

Technologies: Modern Web Technologies, E-Commerce Architecture, Responsive Design

- Developed a fully responsive client e-commerce website for a premium tea brand, ensuring an elegant product presentation tailored to commercial branding standards.
- Implemented digital retail workflows based on client specifications, incorporating intuitive browsing navigation and order-related workflow requirements.
- Structured front-end components to support seamless user checkout flows, payment option requirements, and modern digital retail presentation.

PROFESSIONAL TRAINING & VIRTUAL EXPERIENCE

Tata — Cybersecurity Virtual Experience

Oct 2024 – Nov 2024

Forage Enterprise Simulation

- Conducted enterprise Identity & Access Management (IAM) analysis and developed security policy design proposals.
- Evaluated threat mitigation approaches and designed scalable IAM architecture solutions within simulated enterprise security scenarios.

Deloitte — Data Analytics Virtual Experience

Nov 2024 – Dec 2024

Forage Enterprise Simulation

- Created Tableau business intelligence dashboards and conducted data cleaning routines to extract strategic organizational metrics.
- Designed KPI visualizations to support data-driven decision-making and executive-level stakeholder reporting.

Mastercard — Security Awareness Virtual Experience

Dec 2024

Forage Enterprise Simulation

- Executed threat modelling exercises and designed security awareness modules for simulated enterprise environments.
- Formulated phishing-awareness frameworks to reinforce human-centric cybersecurity controls and operational defense.

Siemens — KPI & Project Reporting

Completed

Forage Simulation

- Completed project-oriented analytical reporting modules focusing on operational KPI evaluation and status reporting.

CERTIFICATIONS

EC-Council:

- Python for Absolute Beginners
- Dark Web & Cryptocurrency

Forage Virtual Experience Programs:

- Tata Cybersecurity
- Mastercard Security Awareness / Threat Analysis
- Deloitte Data Analytics
- Siemens KPI & Project Reporting

EDUCATION

Bachelor of Computer Applications (BCA)

Amity University Maharashtra

Completed: 2026

CGPA: 8.24 / 10

Higher Secondary Certificate (HSC)

Thakur College of Science and Commerce, Mumbai

2023

56.83%

Secondary School Certificate (SSC)

S.I.E.S. High School, Mumbai

2021

73.00%
