

TANISH MANOJ JANGALE

Aspiring Junior Software Engineer / Data Analyst / Cybersecurity Analyst

Ph: +91 93264 82653 | tanishjangale05@gmail.com | linkedin.com/in/tanish-jangale-7025a3298 | Mumbai, MH

Education

BCA

Amity University, Mumbai

CGPA: 8.50 / 10 Aug 2023 – 2026

HSC – 56.83%

Thakur College of Science and Commerce

Mumbai 2023

SSC – 73.00%

S.I.E.S. High School

Mumbai 2021

Technical Skills

Languages

Python • Java • SQL

JavaScript • HTML5/CSS3

Frameworks

React • Node.js • Flask

Databases & Tools

MySQL • MongoDB • Git

Power BI • Tableau • Excel

Concepts

OOP • REST APIs

ML • DBMS • IAM

Data Visualisation

Certifications

EC-Council

Python for Absolute Beginners

Forge – Tata

Cybersecurity Simulation

Forge – Mastercard

Threat Analysis Simulation

Forge – Deloitte

Data Analytics Simulation

Forge – Siemens

KPI & Project Reporting

Soft Skills

Problem-Solving • Team Collaboration

Quick Learner • Attention to Detail

Communication • Time Management

Summary

A passionate and self-driven final-year BCA student (**CGPA 8.50**) at Amity University Mumbai with strong interest in **AI/ML, Data Analysis, Cybersecurity**, and **Full-Stack Web Development**. I enjoy building production-ready applications from scratch, writing clean scalable code, and continuously learning new technologies. Completed **six industry virtual simulations** with Tata, Mastercard, Deloitte, and Siemens. Eager to kickstart my career where technical skills and analytical thinking drive real-world impact.

Experience

Forge – Tata Cybersecurity

Oct 2024 – Nov 2024

Virtual Intern – Cybersecurity

Remote

- Completed structured modules on **Identity & Access Management (IAM)**, security policy design, and threat mitigation strategies.
- Analysed real-world security scenarios and proposed IAM solutions aligned with enterprise best practices.

Forge – Deloitte

Nov 2024 – Dec 2024

Virtual Intern – Data Analytics

Remote

- Built interactive **Tableau dashboards** to visualise business KPIs and surfaced actionable insights from structured datasets.
- Completed an end-to-end analytics pipeline from data cleaning through to visual storytelling and stakeholder reporting.

Forge – Mastercard

Dec 2024

Virtual Intern – Security Awareness

Remote

- Conducted **threat modelling** and designed a phishing awareness training programme for a simulated enterprise environment.

Projects

College Connect – Intra-College Marketplace

Jan 2026 – Mar 2026

React • Node.js • MongoDB • Socket.io • Cloudinary • Nodemailer

- Built a **43-file full-stack marketplace** for verified college students with college-email domain validation and OTP authentication.
- Implemented **real-time Socket.io chat** with typing indicators, Cloudinary image uploads, full-text product search, and admin panel.
- Followed **MVC architecture** with a REST API backend; enforced role-based access across student and admin roles.

ThreatScope – Cybersecurity Intelligence Platform

Aug 2025 – Nov 2025

React • Flask • JWT • REST API • SMTP

- Architected a **full-stack threat-analysis platform** with JWT authentication, role-based access control, and live admin dashboard.
- Built a **file ingestion pipeline** (.txt/.pdf) that classifies threats and auto-generates downloadable PDF reports.
- Integrated **automated SMTP email alerts** to notify administrators of critical security events in real time.
